

Morgan and Jared, guests of the Mayor at the State of the City, 2019.

HOMEOWNERSHIP + HOME

Jared and Morgan, a young married couple just starting a family, were desperately looking for a home in the City but weren't having any luck finding something affordable. Thankfully they found out about the City's *Welcome Home* program, applied, and were approved for an income-qualified 3% low-interest loan. The *Welcome Home* program provides low-to-moderate-income families with the opportunity to become homeowners, as well as helps preserve our housing stock and eliminate substandard homes from our communities. In May 2018 Jared and Morgan moved into their new place in the Popular Grove neighborhood. They love their new neighbors, enjoying the many nearby parks and playgrounds, and being close to downtown.

NATIONAL COMMUNITY DEVELOPMENT WEEK | APRIL 22-26

BOYS & GIRLS CLUB + CDBG

New computers and faster internet have allowed the Lied Club to teach kids programming with online lessons. Diego, Cesar, and Valeria were all working on the same project. Diego finished first but saw that Cesar and Valeria were struggling with theirs. He helped both of them learn some of the trickier concepts. With the fun activities and teamwork they get in My.Future the juniors want to keep coming back every day. Diego is often heard saying "Wait! I have one more activity to do, I want to finish!" These activities have introduced Poplar Grove kids to games help them practice programming! These activities are building their confidence with respect to science and technology subjects, and they've made a lot of progress working as a team to solve problems.

Diego at the Lied Club.

2015-2018

CDBG COMMUNITY DEVELOPMENT BLOCK GRANT
ESG EMERGENCY SOLUTIONS GRANT
HOME HOME INVESTMENT PARTNERSHIPS
HOPWA HOUSING OPPORTUNITIES FOR PERSONS WITH AIDS/HIV

COMMUNITY DEVELOPMENT IN ACTION

Salt Lake City celebrates National Community Development Week to focus attention on the impact of CDBG, ESG, HOME and HOPWA funds in our community. These programs are vital to the well-being of our City and its residents.

These federal dollars are flexible which allows SLC to prioritize them to meet the unique needs of our community. By leveraging these funds SLC is able to further increase their impact: for every 1 dollar in federal funds provided, 3 dollars of private funds were leveraged.

Salt Lake City has focused on projects that:

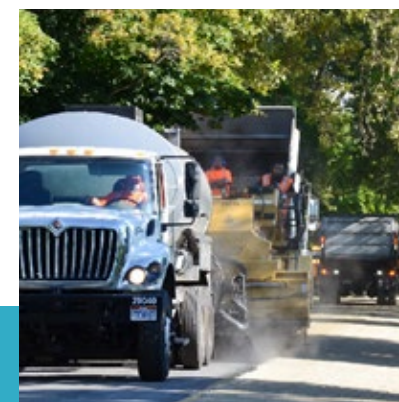

- create and maintain affordable housing
- lift individuals and families out of homelessness
- improve city infrastructure such as streets, sidewalks, and parks
- provide public services that include: access to early childhood education, healthy foods, job training, and transportation assistance
- revitalize small businesses in target neighborhoods

These funds are used to empower our residents, facilitate access to opportunities that otherwise may not have been available, create healthy housing, and improve community spaces. They allow us to create a City that supports vibrant lifestyles, housing, job opportunities, and entrepreneurship.

HOUSING
Creating and maintaining housing for all.

ECONOMIC VITALITY
Job Training and grants offered to small business for exterior improvements.

INFRASTRUCTURE
Improve local roads, enhance safety and usability of sidewalks, and beautify parks.

HOMELESS SERVICES
Access to healthy foods, early childhood education, services, technology, and transportation.

HOUSING AND NEIGHBORHOOD DEVELOPMENT

OUR MISSION

To develop and enhance livable, healthy, and sustainable neighborhoods
