

DEPARTMENT of PUBLIC SERVICES

ERIN MENDENHALL
MAYOR

MARK STEPHENS, P.E.
ACTING CITY ENGINEER

Salt Lake City Corporation
Public Services / Engineering Division

**NOTICE OF STREET CONSTRUCTION
AND RESURFACING PROJECTS**

In accordance with Salt Lake City Code Section 14.32.080, notice is hereby given of upcoming street construction and reconstruction projects anticipated to be performed by Salt Lake City during the three-year period beginning January 1, 2023. Projects listed below represent anticipated locations and construction time frames based on current planning and budget projections. Actual project locations and schedules may vary. The latest project information can be found at : <https://www.slcc.gov/mystreet/>

The purpose of this notice is to provide information concerning work activities in the public way and promote coordination of such activities between all public way users including utility companies, telecommunications providers, developers, contractors, and the general public. This improved coordination is intended to reduce disruption to vehicular and pedestrian traffic on City streets and sidewalks, and to minimize damage to street pavements and public way facilities. As part of this coordination activity, the City Engineer may require users to delay or accelerate the schedule of requested excavation activities. In addition, limited moratoriums of 7 years on the excavation of newly constructed streets, and 3 years on repaved streets will be enforced.

In accordance with City Code Section 14.32.080, each user and prospective user of Salt Lake City's public way, on or before November 1, 2022, shall provide to the City Engineer a start date and completion date of all anticipated major work to be conducted within the public way during the three-year period beginning January 1, 2023. All such schedules shall be sent to:

Mark Stephens, P.E.
Acting City Engineer
349 South 200 East, Suite 100
Salt Lake City, UT 84111
