

Smoke alarms save lives. There should be an alarm in each sleeping area, outside each sleeping area and on every level of where you live. Alarm batteries should be tested each month. Press the test button to be sure the alarm is working. Let's check and see if the place where you live is smoke alarm ready.

## **Smoke Alarm Detective**

- **There is a smoke alarm on every level**
- **There is a smoke alarm in each sleeping place**
- **The batteries were tested**
- **There is not a smoke alarm in the kitchen**
- **The smoke alarms are under 10 years old**

Have a parent or trusted adult check your work and then sign to show you have correctly detected the alarms where you live.
