

# 1300 EAST

## RECONSTRUCTION

Project Location Map

The first phase of the 1300 East reconstruction project is on track and anticipated to be complete in early winter 2019. During the second phase (expected from spring through fall 2019) we will improve mobility, access and drainage along this popular street. Upon completion, residents will enjoy more resilient utility services and a better travel experience.

For more information, you're invited to our next open house, or call or email us.

### OPEN HOUSE

**When:** Thursday, December 6, 5:30 p.m. - 7:30 p.m.

**Where:** East High School  
Commons Area  
840 South 1300 East  
Salt Lake City, UT 84102

### CONTACT INFORMATION

## PROJECT FEATURES

This reconstruction project gives us the opportunity to achieve the following objectives and features:

- Provide reliable utility services
- Implement recommendations outlined in transportation master plans
- Improve travel conditions for people walking, biking, driving and taking transit as required by city ordinance

1300 East Project Team  
349 South 200 East, Suite 600  
Salt Lake City, UT 84111

### Center Turn Lane

Adding a center turn lane will provide a space to make left turns. This design adds consistency and improves traffic flow throughout the corridor. To accommodate the center turn lane, on-street parking between 1300 South and 1700 South will be removed; on-street parking between 1700 South and 2100 South will remain prohibited.

### Bike Lanes

Bike lanes from 1300 South to 2100 South will connect with existing bike lanes to the north. In the future, bikeways or trails will connect south to the Parley's Trail, Sugar House Park and the S-Line.

### Transit Stops

Bus stops along the corridor will be upgraded with boarding areas, shelters, and/or benches as needed. These improvements will make it more convenient for people boarding and exiting the bus.
