

1300 EAST

RECONSTRUCTION

1300 East: 1300 South to 2100 South 11/27/2018 Construction Update

Water main construction is still underway on 1300 East. Installation of the 8" water main is complete on the East side of 1300 East. Installation of the 12" water main is near complete and undergoing testing on the West side of 1300 East. During the current phase of construction, asphalt will be placed to patch water main trenches along 1300 East. The asphalt patches will be temporary until the road is repaved in Spring, 2019. During the current phase, water services will also be replaced or reconnected to the new 8" and 12" water mains. Water service work is starting on the South end of the project between Westminster Ave and 2100 South, working northwards. The map below shows the current construction progress.

Access

- Access to driveways may be limited. However, driveways can be steel plated to allow for access at any time during construction. For steel plates, please contact the Public Outreach Team by calling the project hotline, 801-483-6898.

Traffic

- Travel lanes are still being diverted around construction work and equipment. Traffic control measures will be removed as the work progresses north towards 1300 South.
- There have been a few road-closures between 9pm and 6am for crucial intersection night-work.
- No road closures or detours are anticipated in the current section.
- Because of freezing temperatures, construction watering has been reduced to prevent ice on the road. As a result, dust may be more visible on the road, especially in areas with more traffic. The contractor will continue to thoroughly sweep work areas on a daily basis.

Water Shutdowns

- No water shutdowns are anticipated but may happen periodically if emergency situations are encountered that absolutely require a shutdown.

Sewer Update

- Sewer liner work is complete.

UTA Bus Stops

- Currently, no bus stops are closed in the work zone. Bus stops may be temporarily closed for one to two hours when paving occurs in front of the stop.
- For more information regarding bus stops, please contact UTA customer service at 801-743-3882, or visit www.facebook.com/rideUTA/.

How are we doing?

Is there a specific issue we can address about the project?

Please let us know at one of these contact points:

Construction hotline: 801-483-6898
