

# 1700 SOUTH RECONSTRUCTION

## From 1700 East to 1900 East

### PROJECT UPDATE | JANUARY 2019

Due to inclement weather, crews are now expected to finish upgrading the storm drain system by the end of the month. Upon completion of this task, they'll repave the street with temporary asphalt to resume travel on 1700 South. In order for this repaving activity to not be delayed, and to avoid damage to vehicles, on-street parking we'll be prohibited from 1700 East to 1900 East.

Crews are expected to work Monday through Friday, and possibly Saturdays from 7 a.m. to 5 p.m. More updates will be provided as crews move to different areas and achieve project milestones.

### WHAT TO EXPECT

Residents should expect heavy construction equipment, noise, vibrations, dust, and temporary modified access to residences with brief utility interruptions during the work day. Due to the narrow street width, only eastbound travel will be allowed along 1700 South while we complete these tasks, however temporary road closures should be anticipated as well. Both travel directions will open during the first week in February.

### SAFETY

Safety is our highest priority. Please be cautious of trucks and equipment around the construction site. Work zone will be barricaded to protect the public, while activities aren't in progress. Please keep children from playing on or around parked equipment and materials stored on-site.

If anyone in your household has a disability and needs special accommodations while our crews are present, ask them for help and they'll be happy to assist. For any emergencies please call 911.
