

# 1300 EAST CONSTRUCTION UPDATE

MAY 24, 2019

## Upcoming Work Activities

- **Due to the rain, work will be placed on hold through the rest of this week.**
- Asphalt removal between 2100 South and 1700 South is now complete. When work resumes, crews will continue to remove the concrete layer of the roadway. This process will take up to two weeks to complete.
- Curb and gutter will be removed concurrently with the concrete layer of the road. Resident driveway approaches will be left intact until the time comes to replace them.
- Following the concrete removal process, the team will excavate the road down to the new subgrade level.
- Storm drain installation will take place intermittently throughout the closed section of 1300 East, as well across the 2100 South/1300 East intersection. Intersection work will take place mainly at night.
- Crews are working on the installation of new gas line facilities from 2100 South to near Westminster Avenue. Expect temporary outages of gas line services during daytime hours for the next three to four weeks.

## Safety

- We remind all residents accessing their homes in the closed corridor to drive slowly through the work zone and to exercise extreme caution. Please be attentive to the changing situations. This is an active construction zone and you will be subject to heavy equipment, construction traffic, and changing conditions through the life of the project. *If there is a barrel or panel in front of your driveway, please note that a hazard exists and you should park elsewhere until the situation is resolved.*
- Motorists are reminded to watch out for trucks entering and leaving the work zone.
- Pedestrians are still permitted in the work area on the sidewalks, but please remember that this is an active construction zone. Please only cross the work zone at existing road crossing locations to avoid the many tripping hazards throughout the closed area. Always make eye contact with equipment operators before proceeding into the area to ensure that they see you.
