

1300 EAST CONSTRUCTION UPDATE

MAY 31, 2019

Reminder

- **1300 East: 2100 South to 1700 South is CLOSED to all through-traffic. The road will remain closed through the end of July, and will not re-open at any time. Please use an alternate route.**

Upcoming Work Activities

- Removal of the concrete layer of the roadway between 2100 South and 1700 South is underway. This process will continue through the next two weeks. Nearby residents and businesses should expect increased noise and vibrations during this work, starting as early as 7:00 a.m.
- Curb and gutter is being removed concurrently with the concrete layer of the road. Resident driveway approaches will be left intact until the time comes to replace them.
- Following the concrete removal process, the team will begin excavating the road down to the new subgrade level.
- Crews are working on the installation of new gas line facilities from 2100 S. to near Westminster Ave. Expect temporary outages of gas line services during day time hours for the next three to four weeks.
- Storm drain installation will take place intermittently throughout the closed section of 1300 East, as well across the 2100 South/1300 East intersection. Intersection work will take place mainly at night.
- Crews will be out working up to seven days a week to make up for time lost due to rain delays.

Safety

- We remind all residents accessing their homes in the closed corridor to drive slowly through the work zone and to exercise extreme caution. Please be attentive to the changing situations, as this is an active construction zone. ***If there is a barrel or panel in front of your driveway, please note that a hazard exists and you should park elsewhere until the situation is resolved.***
- Pedestrians are still permitted in the work area on the sidewalks. Please only cross the work zone at existing road crossing locations to avoid the many tripping hazards throughout the closed area. Always make eye contact with equipment operators before proceeding into the area to ensure that they see you.
