

Salt Lake City Corporation

Construction Update | June 7, 2019

These are the activities our construction team will be conducting over the next two weeks*:

- Crews will be constructing curb and gutter and portions of the new concrete pavement.
- Other items include: storm drain upgrades at 1100 East and sewer repairs.
- Work is expected Monday through Friday and some Saturdays from 7 a.m. to 5 p.m.

* *Work and schedule are subject to change due to weather or unforeseen circumstances.*

Safety is our Priority

Please be cautious of construction activities during the day and while trucks and equipment are moving around the work zone.

- We will barricade disturbed areas while crews aren't working to help maintain a safe work zone.
- Keep children from playing on and around the equipment and materials stored on-site.
- Parking is restricted within the work zone.

If anyone needs help accessing or moving around the work zone, please request help from our on-site personnel.
