

# 1300 EAST CONSTRUCTION UPDATE

AUGUST 9, 2019

## Upcoming Work Activities

- Curb and gutter replacement will start on the west side of the roadway on Monday, August 12. We remind residents and pedestrians not to walk or drive on newly-poured concrete, as it requires several days of cure time.
- Curb, gutter, sidewalk, and driveway approach replacement continues on the east side of the roadway.
- Over the next couple of weeks, crews will continue to remove any remaining concrete, on both the east and west sides of 1300 East, to prepare for the new curb, gutter, and sidewalk.
- All road excavation is scheduled to finish up early next week. Granular Borrow placement follows the road excavation. Granular Borrow is the first section of the new road that will be installed.
- Paving is tentatively scheduled to begin the second week of September.
- Storm drain installation is nearly complete. There is still outstanding storm drain work in the 1700 South/1300 East intersection and the 2100 South/1300 East intersection. Work in the 2100 South/1300 East intersection will take place mainly at night.
