

# 2000 East

Parley's Canyon Boulevard to City Limits (2930 South)

## Overview

Thank you to the residents that provided feedback for this important project. Beginning this spring, we'll reconstruct 2000 East (highlighted in red dashed line below) from the intersection at Parley's Canyon Boulevard to the city limit with Millcreek. The pavement surface, sidewalks, curb, and gutter will be upgraded, and a new street design will help us meet the Salt Lake City's complete streets ordinance and long-range master plans. A new roundabout will be constructed at the intersection of Parleys Canyon Boulevard and 2000 East. Other improvements include a new water line and storm drain, piping to close the open ditch, upgraded crosswalks, and a multiuse pathway (shown in blue). Construction will be completed by late 2020.

## Project Value

This investment is valued at \$3 million and is funded via impact fees and the streets reconstruction bond, which is part of the **Funding Our Future** initiative, approved by voters in 2018.

## Stay Informed

Email "Updates" to [2000East@slcgov.com](mailto:2000East@slcgov.com) to receive notifications about our progress until we reach project completion.
