

500 EAST RECONSTRUCTION- FROM 1700 SOUTH TO 2100 SOUTH JUNE 23, 2020

WORK ACTIVITIES

- Crews continue to work on installing the new storm drain system between Blaine Avenue and Coatsville Avenue. This task is expected to continue until the end of next week. Most of this task is occurring along the west side of the street, hence the 7 a.m. to 4 p.m. southbound restriction for local traffic.
- Testing of the new water line is now complete. Over the next couple of weeks, crews will begin to connect all residences to the new line at a rate of three or four homes per day. During this time, residents might experience water shut offs of up to two hours.
- Demolition of old sidewalk panels and drive approaches is ongoing. Crews are starting to prepare these areas to pour concrete, which can take up to 10 days to cure.
- The installation of the water line segment, between Coatsville Avenue and Ramona Avenue, is expected to begin in late-July. We will provide pertinent information on how we'll mitigate those impacts once we reach the appropriate date.

SAFETY

- Crews will notify impacted neighbors before access to driveways is restricted due to these construction activities. They will also provide neighbors a 24-hour notice before any water shut off. Please let us know if you'll need special accommodations once you receive your notification.
- Please park along side streets while the concrete cures to avoid damage to vehicles and these new surfaces.
- **The southbound direction is closed to through traffic Monday through Friday, from 7 a.m. until 4 p.m.**
- During these southbound closures, local traffic is still allowed. **Northbound direction remains closed at all times.**
- Travelers in the area are advised to follow instructions from signs, flaggers and equipment operators.

**The schedule of the project is subject to change due to weather or unforeseen circumstances.*
