

# 700 WEST RECONSTRUCTION FROM 1600 SOUTH TO 2100 SOUTH JUNE 3, 2020

SALT LAKE CITY has selected **Acme Construction, Inc.** to reconstruct and improve 700 West.

Over the next few months, crews will:

- Upgrade the existing underground storm drain system.
- Enclose portions of the open ditch along the east side of the street.
- Repair an aging sewer line as needed.
- Install curb and gutter to improve drainage.
- Construct sidewalks to enhance pedestrian safety, and concrete drive approaches to improve access to adjacent properties.
- Repave the street with new asphalt to extend the roadway longevity and improve the movement of people and products.

These activities will begin in early June\* with completion by Thanksgiving.

## SAFETY

### **Construction safety is our highest priority.**

Please be cautious of our construction activities while trucks and equipment are moving around 700 West. While work is not in progress, the work zone will be barricaded to protect the public. Please keep children from playing on and around parked equipment and materials. Parking is restricted within work zones.

With your help, we'll complete a safe and successful project!

*\*The project schedule is subject to change due to weather or unforeseen circumstances.*
