

1300 EAST CONSTRUCTION UPDATE

AUGUST 7, 2020

Upcoming Work Activities:

- The final storm drain boxes will arrive and be installed near Browning Avenue by the end of the week.
- On Monday, August 10, crews will begin to place granular borrow along the east side of the road. They will begin on the south end of the project, near 1700 South, and move northward. Granular borrow is the first section of the new road that will be installed. This will take about a week and a half to complete.
- On August 12, crews will begin roadway demolition and excavation on the **west** side of the street, including the removal of the concrete layer of the road, as well as removal of curb, gutter, driveway approaches, and some sidewalk panels. This activity is expected to take about a week to complete. After all of the concrete elements have been removed, crews will proceed with excavating the road down to sub-grade.
 - *During concrete removal, residents may experience increased vibrations due to construction equipment. To avoid damages to personal property, please remove fragile/breakable things from walls and horizontal surfaces during construction.*
- Curb and gutter replacement is scheduled to begin on Wednesday, August 26.

Traffic Alerts

- Residents driving to their homes in the construction zone should expect **changing roadway patterns starting Wednesday, August 12**, as crews begin shifting traffic to the east side of the road in segments. Stay alert and pay attention while driving through the work zone.
- 1300 East: 1700 South to 1300 South is **CLOSED** to all through traffic. Suggested detour routes include: 2100 South, 1300 South, and 800 South/Sunnyside

Safety:

- We remind residents accessing their homes in the closed area of 1300 East to drive **slowly** through the work zone and to use caution. Remember, **ONLY SOUTHBOUND** traffic is allowed from 1300 South to 1700 South. Please be attentive to the changing work zone conditions.
- We want to remind people traveling on the sidewalks that **this is an ACTIVE WORK ZONE**. When walking through the area, you must remember to look around you, **cross the street at designated crossing areas only**, and to make eye contact with equipment operators so they know you are there.
- During construction, drivers are reminded to watch out for trucks entering and leaving the work zone, and to follow directions from flaggers on-site assisting with the safe flow of traffic.

**Schedule is subject to change due to weather or other unforeseen circumstances.*
