

1300 EAST CONSTRUCTION UPDATE

AUGUST 14, 2020

Upcoming Work Activities:

- Crews are now placing granular borrow along the **east** side of the road. Granular borrow is the first section of the new road that will be installed. This should be completed by mid-week next week.
- All of the east-side storm drain laterals have been connected to the newly installed storm drain main line. Sometime next week, crews will begin connecting the west-side storm drain laterals to the new line. This process will take about 10 days.
- Roadway demolition and excavation on the **west** side of the street, including the removal of the concrete layer of the road, as well as removal of curb, gutter, driveway approaches, and some sidewalk panels, is now underway. This will continue through August 21. After all of the concrete elements have been removed, crews will proceed with excavating the road down to sub-grade, and then begin placing granular borrow on the west side.
 - *During concrete removal, residents may experience increased vibrations due to construction equipment. To avoid damages to personal property, please remove fragile/breakable things from walls and horizontal surfaces during construction.*
- Curb and gutter replacement is scheduled to begin on Wednesday, August 26.

Traffic Alerts

- Residents driving to their homes in the construction zone should expect **changing roadway patterns over the next couple of weeks**, as crews begin shifting traffic to the east side of the road in segments. Stay alert and pay attention while driving through the work zone.
- 1300 East: 1700 South to 1300 South is **CLOSED** to all-through traffic. Suggested detour routes include: 2100 South, 1300 South, and 800 South/Sunnyside Avenue to Foothill Drive, State Street, or 700 East.

Safety:

- We remind residents accessing their homes in the closed area of 1300 East to drive **slowly** through the work zone and to use caution. Remember, **ONLY**

SOUTHBOUND traffic is allowed from 1300 South to 1700 South. Please be attentive to the changing work zone conditions.

- We want to remind people traveling on the sidewalks that **this is an ACTIVE WORK ZONE**. When walking through the area, you must remember to look around you, to **cross the street at designated crossing areas only**, and to make eye contact with equipment operators so they know you are there.
- During construction, drivers are reminded to watch out for trucks entering and leaving the work zone, and to follow directions from flaggers on-site assisting with the safe flow of traffic.

**Schedule is subject to change due to weather or other unforeseen circumstances.*
