

1300 EAST ROAD OPENING!

We are excited to announce that after many months of hard work, the second and final phase of the 1300 East Reconstruction project is complete! **1300 East will be fully open to the public on Monday, November 16, 2020.**

During Phase 2, we:

- replaced all driveway approaches and decaying sidewalk segments
- upgraded to a new storm drain system to improve roadway drainage
- created new ADA compliant bus stops
- replaced all pavement, curb, and gutter
- added bike lanes in both directions

Full reconstructs, especially on a road as old as this one, are very challenging, and we had many obstacles to overcome throughout the process. In the end, though, we have successfully improved access, mobility, and drainage along this section of this important city thoroughfare.

Note: Motorists may experience intermittent shoulder closures or lanes shifts for the next 30 days, as crews work to complete minor final work activities.

We would like to thank you all for your patience and cooperation during construction, and invite you to send any feedback, questions, or concerns regarding this project to our team using the email address below. We really appreciate it!
