

When it's time to choose new appliances and cars:

Save money, clean the air, GO ELECTRIC!

Even efficient gas appliances and cars keep you on the **fossil fuel path.**

Fossil fuels generate unhealthy air pollution.

Gas utility bills and fuel prices are unpredictable.

Fueling up with gasoline is **more expensive** than electric!

Choosing electric cars and appliances puts you on a **better path.**

Electric appliances mean cleaner air in a comfortable home.

The electrical grid is getting cleaner over time!

Choosing electric can save you over **\$1,700** per year on fuel and energy costs!

Clean Electric

Fossil fuels

CLEAN ELECTRIC OPTIONS

Reliable and readily available:

- ✓ HVAC heat pump
- ✓ Electric kitchen range
- ✓ Heat pump water heater
- ✓ Electric vehicles

CURRENT ANNUAL EMISSIONS

New fossil fuel appliances and cars: **26,862 lbs. CO₂e**

New electric appliances and cars: **20,967 lbs. CO₂e**

Electric appliances and vehicles + clean electric grid: ZERO emissions!

Join the zero emissions future:
