Subject: CDCIP Board letter of support

To: <[ECavenuesCommunityAction@gmail.com](mailto:ECavenuesCommunityAction@gmail.com)>

Dear Members of the CDCIP Board,

I am a resident of Browning Avenue between 1300E and 1100E, which is in the McClelland Trail neighborhood, and I wholeheartedly support the community led “McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature” CIP application

I’ve lived on the street for three years now with my wife and dog, and I’ve experienced many cars passing well above marked speed limits as they come rolling down our big hill. I’ve been very concerned for pedestrians, kids, and pets (like mine!), and cyclists as they travel on the street and use the trail.

This letter offers my support for adding a traffic calming amenity (eg. concrete planters) that will improve safety and trail user experience for those of us living in the area as well as those using the trail.

The project would greatly improve safety and walkability in our neighborhood and on the McClelland trail.

I support the “McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature” project for funding through the Capital Improvement Process, and sincerely hope you will give this project your full consideration.

Sincerely,  
Jackson Bellaimey  
1207 E Browning Ave.

Dear Members of the CDCIP Board,

I am a resident of the McClelland Trail neighborhood and I support the community-led "McClelland Shared Street Improvements" CIP application.

I have experienced cars traveling at high speeds on our residential street and am concerned for pedestrians, cyclists, children and pets on our street—especially ones using the McClelland Trail.

This letter offers my statement of support for and intent to collaborate with Salt Lake City to design a traffic calming amenity – for example, concrete planters-- that will enhance safety and user experience of those residing in the McClelland Trail neighborhood and also of those using the Trail.

The project will be a tremendous asset to our neighborhood and surrounding neighborhoods that use the McClelland trail on bike and foot. In addition to changes to the streets themselves (e.g. calmer traffic, safer spaces for walking and bicycling) the project will also aid in the usability of the McClelland Trail generally which will benefit residents far beyond our neighborhood.

We support the "McClelland Shared Street Improvements" project for funding through the Capital Improvement Project process, and sincerely hope you will give this project your full consideration.

Dear Members of the CDCIP Board,

I am writing in support of traffic calming on Browning Avenue below 1300 East in Salt Lake City, and I support the community-led "McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature" CIP application.

I live at 1213 East Browning Avenue and have witnessed the cars, bikes, and skateboards speeding down the hill past my home. Each time one of them goes by, I fear an accident that might harm the speeder or an innocent bystander.

The opening of the McClelland Trail has heightened the need for traffic calming of some sort with increasing numbers of pedestrians and bicycles crossing Browning Avenue near 1200 East. Traffic calming of some sort is a natural next step in the life of the trail. Preventative measures are far better than regrets.

Thank you for considering the "McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature" CIP application.

Sincerely,

Neil E Cotter

January 6, 2019

Dear Members of the Board,

I am a resident of Browning Avenue. My house is directly adjacent to the McClelland Trail. As someone who has seen too many cars whizzing by at high speeds at the trail entrance, I wholeheartedly support the community-led "McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature" CIP application.

I wish I could say that speeding on Browning Avenue was a rare occurrence, however, it is not. I am very concerned for the pedestrians who use the Trail especially children walking to and from school or using it in the afternoon after school or all day through the summer to visit friends and enjoy the neighborhood. I also see bike groups and others enjoying the trail. One of the pros of the official McClelland Trail was that it would provide a walk able and friendly environment for the area. At first, it appeared that way, however, with time and watching more and more cars speeding by, I can say that it is not the case.

This letter serves as my statement of support for a traffic-calming amenity that will enhance the safety and user experience of those residing and using the McClelland Trail. From talking with neighbors, who are the founding members of the East Central Avenues Community Action Committee, there are several examples of traffic calming amenities that could work in our neighborhood, including concrete planters.

Traffic calming amenities will make the McClelland Trail what we were told it would be when the city proposed the trail-a safe walk able and bike able trail.

I strongly support the application from the East Central Avenues Community Action Committee and urge you to approve the project for funding through the Capital Improvement Project process. Please do not hesitate to contact me if you want to hear about my experience with speeding cars. As someone who lives directly adjacent to the trail, I have many examples that I can share.

Sincerely,

Lenora Olson

Dear Members of the Board,

I am a resident of Browning Avenue and my house is directly adjacent to the McClelland Trail. I support the community-led "McClelland Trail Neighborhood-Wide Traffic Calming and Garden Feature" CIP application.

Prior to and since the completion of the McClelland trail I have been concerned about traffic speeding up and down Browning between 1100 East and 1300 East with little to no concern about the trail crossing. Children walking to school, bicyclists, seniors, and others of all ages use this community trail. While the trail was being designed my wife and I attending planning meetings and advocated for speed bumps in anticipation of the issue of pedestrian safety. During the planning phase we were made aware that speed bumps were no longer allowed by Salt Lake City. Other options are available and this is why I support a traffic calming and garden feature. Without some type of intervention I believe that it is only time before we have a serious vehicular-pedestrian crash associated with the trail crossing. Traffic calming amenities will make the McClelland Trail what we were told it would be when the city proposed the trail – a neighborhood trail offering safety and tranquility to the walker and bicyclist.

I strongly support the application from the East Central Avenues Community Action Committee and urge you to approve the project for funding through the Capital Improvement Project process. Please feel free to contact me if you would like to discuss my concerns as well as suggestions to improve the safety of our neighborhood.

Sincerely,

Jim Brandi

12/7/13

To whom it may concern,

My name is DAN MCGUIRE and I have lived at 1239 Roosevelt Ave since 1995. I used the McAdams trail well before it was developed into its present state - and I was not in favor of the improvement. Over the last several years I have noticed a considerable increase in the usage of the trail and have changed my mind to favor it. Unfortunately, the historic traffic issue causes the trail crossings to be quite dangerous. I am fully in favor of the change (traffic calming) suggested.

Thanks for your attention!

I'm concerned about impact of any project on parking.

Also propose speed bumps as a workable option. Not sure why the City is opposed to this!

This letter offers my statement of support for and intent to collaborate with Salt Lake City to design a traffic calming amenity – for example, concrete planters-- that will enhance safety and user experience of those residing in the McClelland Trail neighborhood and also of those using the Trail.

The project will be a tremendous asset to our neighborhood and surrounding neighborhoods that use the McClelland trail on bike and foot. In addition to changes to the streets themselves (e.g. calmer traffic, safer spaces for walking and bicycling) the project will also aid in the usability of the McClelland Trail generally which will benefit residents far beyond our neighborhood.

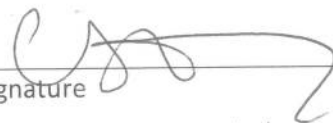

We support the "McClelland Shared Street Improvements" project for funding through the Capital Improvement Project process, and sincerely hope you will give this project your full consideration.

Salt Lake City, UT 84114-5488

Dear Members of the CDCIP Board,

I am a resident of the McClelland Trail neighborhood and I support the community-led "McClelland Shared Street Improvements" CIP application.

I have experienced cars traveling at high speeds on our residential street and am concerned for pedestrians, cyclists, children and pets on our street—especially ones using the McClelland Trail.

This letter offers my statement of support for and intent to collaborate with Salt Lake City to design a traffic calming amenity – for example, concrete planters-- that will enhance safety and user experience of those residing in the McClelland Trail neighborhood and also of those using the Trail.

The project will be a tremendous asset to our neighborhood and surrounding neighborhoods that use the McClelland trail on bike and foot. In addition to changes to the streets themselves (e.g. calmer traffic, safer spaces for walking and bicycling) the project will also aid in the usability of the McClelland Trail generally which will benefit residents far beyond our neighborhood.

We support the "McClelland Shared Street Improvements" project for funding through the Capital Improvement Project process, and sincerely hope you will give this project your full consideration.
