

Salt Lake City Transportation

600 & 700 NORTH IMPROVEMENT STUDY

THE 600/700 NORTH MOBILITY, SAFETY, & TRANSIT IMPROVEMENTS STUDY

The 600/700 North Mobility, Safety, and Transit Improvements Study will create a plan to transform this critical Westside Salt Lake City corridor in ways that promote safety, enable mobility for active modes and transit, and better serve the surrounding neighborhoods.

With input from local stakeholders and community leaders, the Study will identify specific projects to be phased in during the next few years. In anticipation of new frequent transit service on the corridor in 2021, the project will determine how transit stops are oriented on the corridor.

NEXT STEPS

The project team has been busy developing alternatives for the corridor, which will be available for public review in November. Get on our mailing list or check the project website for new content.

Check out the quick build project at 1200 W. The temporary, quick-build improvements are located at the intersection of 1200 West and 600 North and include pavement art, curb extensions, and protected bike lanes. The demonstration intended to drum up enthusiasm among the community and help residents visualize possibilities for permanent multi-use projects that could be included.
